

INTELLIA SOFTWARE SOLUTIONS

INTELLIA ELECTRONIC HEALTH RECORD

Experience seamless medical processes and smooth medical data exchange with the Intellia platform – a comprehensive suite of components designed to cater to your unique needs.
Enjoy the benefits of all advantages integrated into one product.

Electronic Health Record

Empower your primary healthcare practice with our Electronic Health Record component – your trusted ally in medical management. Seamlessly facilitating essential tasks for receptionists, nurses, physicians, managers and cashiers our platform offers:

- Efficient patient data management
- Comprehensive encounter documentation including vital signs, complaints, examination findings, prescribed medications, lab orders, imaging requests, and other essential prescriptions
- Diagnoses based on the latest ICD-11 standards (ICD-10 may be used by request)
- Timely notifications for upcoming and past events
- A streamlined internal messaging system for effective communication
- Task management module that helps users organize, assign, and track clinical and administrative tasks, ensuring timely follow-ups, improving team coordination, and reducing missed actions
- Thorough logging of all business events for enhanced record-keeping
- Robust administration features allowing for easy management of users and their roles, real-time visibility into online status, and access to event and system logs

Schedule patients visits

Simplify scheduling with intuitive tools for managing staff and shift plans

- Manage schedule templates with ease – define availability, on-call duty, and unavailability.
- Book patient visits with a single click – streamline workflows and reduce waiting times.
- Let patients schedule their own appointments online – saving time for both staff and patients.

The screenshot displays the Intellicare scheduling software interface. A 'Fill timeslot' modal is open, showing patient details for Anastasia Bercovici. The modal includes fields for Full name, Birth date, National ID, Phone, and Email. Below these fields is a search bar with the text 'Search for a patient' and a 'Search' button. A 'Note' field is also present. At the bottom of the modal are 'Schedule' and 'Close' buttons. The background shows a calendar view for June 4-10, 2025, with a sidebar menu on the left containing options like Dashboard, Patient Search, Waiting Room, Scheduling, Tasks, My Tasks, Tasks I created, Notifications, and Mailbox. The user is logged in as 'u.receptionist'.

Encounter Management

Empower your primary healthcare practice with our Electronic Health Record component – your trusted ally in medical management. Seamlessly facilitating essential tasks for receptionists, nurses, and physicians, our platform offers:

- Access everything you need — allergies, diagnoses, prescriptions — instantly.
- Quickly capture vital signs and other data
- Use predefined clinical notes template
- Select ICD-11 (ICD-10) diagnosis
- Easily prescribe medicaments, lab analysis or diagnostic procedure

ICD-11 integrated EHR

Harnessing all the advantages offered by ICD-11:

- Reflects advancements in medical knowledge and understanding, ensuring greater accuracy in diagnosing and classifying diseases. Its updated framework incorporates input from a diverse range of medical professionals worldwide, making it more comprehensive and culturally relevant.
- Introduces improvements in coding specificity, facilitating more precise data collection and analysis.
- Embraces digital technology, providing greater interoperability with electronic health records and other healthcare information systems.
- Represents a significant advancement in disease classification, offering benefits such as improved accuracy, enhanced specificity, simplified coding, and better compatibility with digital health systems.
- If your medical institution uses ICD-10, Intellia EHR can seamlessly integrate and support it.

Task Management

Helps users organize, assign, and track clinical and administrative tasks, ensuring timely follow-ups, improving team coordination, and reducing missed actions.

- Create tasks manually or automatically (e.g., based on events, templates).
- Include descriptions, deadlines, priority levels, and categories of tasks
- Create sub-tasks
- Assign tasks to specific users (executors and participants)
- Trigger automatic reminders or notifications
- Set recurrent tasks (daily, weekly, specific date etc.)
- Track task progress (e.g., not started, in progress, completed)
- Use labels - a visual indicators that convey additional contextual significance

The screenshot displays a 'Task' management interface with a sidebar on the left containing navigation links: Dashboard, Patient Search, Waiting Room, Scheduling, Tasks, My Tasks, Tasks I created, Notifications, Mailbox, Invoices, Payments, and a user profile for 'u.manager'. The main form is titled 'Task' and includes the following fields and options:

- Category:** A dropdown menu currently set to 'Encounter'.
- Title:** A text field containing 'Follow up encounter 225025520 (lab results to be analysed before)'.
- Description:** A text area containing 'Encounter 225025520 to be updated (diagnosis) based on lab results. Set visit to Mr. John Smith for further treatment strategy'.
- Schedule:** A section with the following options:
 - ☒ Is recurrent: Includes an 'End recurrent date' field set to '06/09/2025'.
 - ☒ Repeat again at: Includes a 'date' field set to '06/06/2025' and a 'tasks.task.schedule.time' dropdown set to '10:00AM'.
 - ☐ Repeat every: Includes a numeric input field and the text 'days since now'.
 - ☐ Repeat every: An empty option.
- Status:** A dropdown menu set to 'To do'.
- Due date:** A date field set to '28/06/2025' with a 'Set today' button.
- Due time:** A dropdown menu set to '09:30AM'.
- Priority:** A dropdown menu set to 'Routine'.
- ☒ Assign to me: A checkbox option.
- Participants:** A section with two user tags: 'Roman Peles' and 'Irina Maria'.
- Notify creator:** Two checkboxes, 'In app' and 'By email', both of which are checked.
- Notify assignee:** A section with no visible options.

At the bottom right of the form are three buttons: 'Save' (blue), 'Save and close' (blue), and 'Close' (red).

Data Exchange

Ensure seamless bi-directional medical data exchange between Intellia and any other Electronic Health Record systems in compliance with the universal Fast Healthcare Interoperability Resources (FHIR) standard. Serves as an intermediary element that transforms non-FHIR datasets to FHIR datasets and vice versa.

- **Easily generate invoices based on the services you provide, with just a few clicks.**
- **Mark payments as completed instantly with one-click confirmation.**
- **Customize your invoice templates.**
- **Stay on top of your revenue cycle with clear reporting.**
